

Classic SS & Classic FF

Classic SS is a sinking (SS) pellet for use in marine farms and Classic FF is a floating (FF) pellet for use in ponds and recirculation systems. Classic SS & Classic FF are high protein, low lipid feeds designed to produce good growth rate and feed conversion for Barramundi, Grouper and other marine finfish. Classic SS and FF do not contain products of mammalian origin (MP-Free).

Composition

Crude protein	43.0%
Crude lipid	15.0%
Carbohydrates	25.0%
Moisture	9.0%
Ash	8.0%
Total Phosphorus	1.1%
Avail. Phosphorus	0.7%

Declared Energy

Composition per kg of feed

Gross Energy	20.4MJ
Digestible Energy	17.5MJ

Ingredients

Fish meal, poultry protein meals, wheat, plant protein meal, fish oil, poultry oil, vitamins, minerals.

LipoBalance™

Our LipoBalance™ concept at the foundation of our alternative oil formulations is based on extensive research, commercial production and testing. Through LipoBalance™, fish oils and alternatives are blended to maintain the consistently high level of Omega-3 (EPA and DHA) fatty acids required in the final product. The process improves our sourcing flexibility, long term sustainability and stabilises costs. LipoBalance™ provides a safe, healthy and proven path to meet final product quality needs without compromising growth, feed conversion or flesh attributes.

Suggested Pellet Sizes

Pellet size		Barramundi weight
SS	FF	
4mm	5mm	60g
6mm	7mm	150g
9mm	9mm	250g
11mm	11mm	750g

Environmental Impact

Maximum amount of discharge (kg) per 1,000 kg fish produced

Nitrogen (N)	FCR = 1.2	FCR = 1.5
Dissolved Waste	44.3	62.9
Solid Waste	8.3	10.3
Total Waste	52.6	73.2

Phosphorus (P)	FCR = 1.2	FCR = 1.5
Dissolved Waste	4.3	6.4
Solid Waste	4.8	6.0
Total Waste	9.1	12.4
